

OXFORD

IP55 Metric Motors Driving Industry World Over

ELECTRIC MOTORS

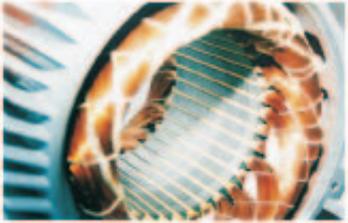

ISO 9001 CERTIFIED

WORLD CLASS INDUCTION MOTORS

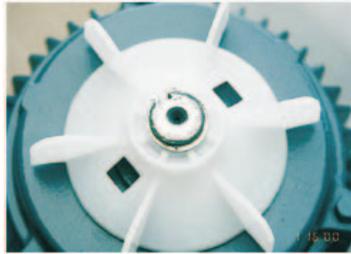

Long life features.

Our experience has given us the knowledge to provide motors you can depend on and motors that last. Here are some of the features that set these motors apart.

Premium insulation system.

The insulation system has been designed to withstand a wide range of environmental conditions, thermal shock and voltage stress. Its non-hygroscopic insulation components in the stator resist moisture and help prevent motor failure.

Efficient cooling system.

The cooler a motor runs, the longer its insulation will last. High airflow with an external fan on IP55 motors assure cool operation, low noise and increased motor life.

Vacuum de-gassed, clean steel bearings. Bearings are anti-friction shielded with lithium-based grease.

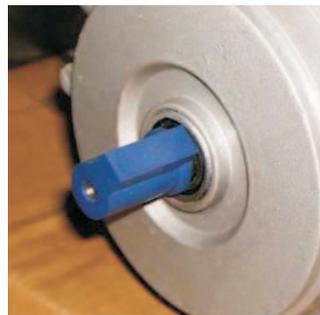

Pressure cast aluminum rotor.

Pressure casting eliminates variations in bar and end ring resistance. It produces a rotor that gives more consistent performance.

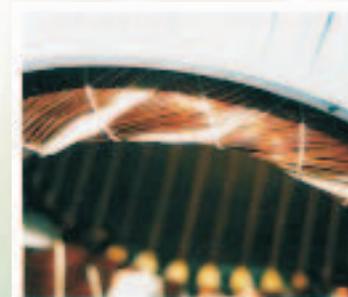

Heavy-duty stator frames and endshields. Cast iron construction of stator frames and endshields assures excellent corrosion resistance in most industrial environments. Parts are precisely machined to close tolerance and jig drilled to assure alignment, minimum vibration and ready interchangeability.

Dynamically balanced rotor.

Balance is critical to the life of the motor. The slightest deviation from the standard can result in excessive vibration which causes additional wear on the bearings and premature motor failure. To prevent this problem, precision electronic equipment is used to carefully balance every rotor and shaft assembly.

Copper Windings. Heat and moisture resistant polyester enameled copper wire is used for all stator windings.

Specially designed shaft.

An endshield design that provides IP55 motor protection. It helps prevent contaminants from getting into the bearing.

Easy access conduit box.

The conduit box can be removed and rotated in 90° increments to facilitate installation with terminal board.

OXFORD Motors is proud to introduce the IP55 Metric Motor line of rugged, all-purpose motors. The cast iron, totally enclosed fan cooled IP55 construction makes this motor the preferred choice for almost any application in even the toughest environments.

TYPICAL APPLICATIONS:

- ★ Material handling
- ★ Fans, Blowers
- ★ Lifts
- ★ Valve Actuators
- ★ Saw Mills
- ★ Cranes
- ★ Granite / Marble / Stone Industry
- ★ Machine Tools
- ★ Agro Industry
- ★ Stone Crushers
- ★ Fertilizers
- ★ Textiles
- ★ Food Processing
- ★ Pulverisors
- ★ Compressors
- ★ Pumps
- ★ Gear Drives
- ★ Flour Mills

STANDARD RATINGS :

- 2 pole 0.18-315Kw
- 4 pole 0.12-315Kw
- 6 pole 0.18-250Kw
- 8 pole 0.18-200Kw
- 10 pole 45.0-160Kw

STANDARDS:

Built to meet or exceed the IEC standards for dimensions and performance.

- IEC 34-1 Performance
- IEC 72D Dimensions
- IEC 34-5 Degree of Protection

EFFICIENCY :

Confirm to **EFF-2** Level & are **CE** marked.

POWER SUPPLY :

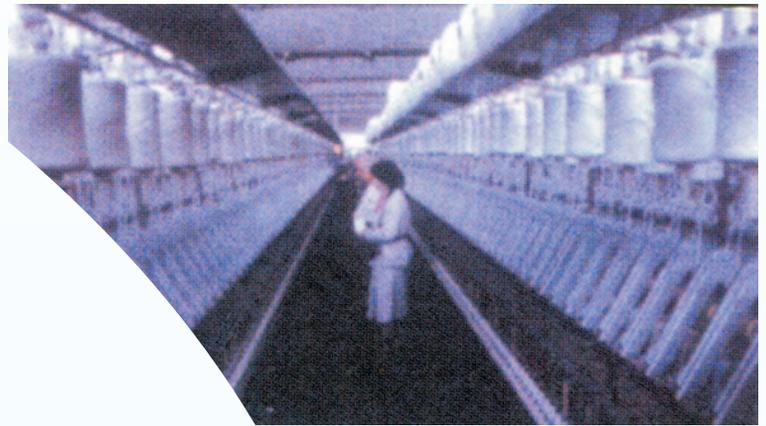

For greater application flexibility and increased safety margin our motors are suitable for 415V +/-6%, 50Hz +/-5%, combined variation allowed +/-10%

AMBIENT TEMPERATURE :

-15 to 45 degree C is standard.

SERVICE FACTOR :

These motors have a 1.15 S.F. at 50Hz, typical for IEC motors, Duty class S1.

CONSTRUCTION :

The rugged cast iron construction of the frame, endshields, integral feet and flanges absorbs Shock and reduce motor vibration to provide a low-maintenance motor life.

TERMINAL BOX :

The terminal box is of cast iron construction and is available on Top.

STATOR WINDING & INSULATION:

The stator core is built up from low loss, high permeability, silicon steel for increased efficiency. It features a class F insulation system with design for class B maximum temperature rise.

ROTOR :

The rotor is built with the same high quality lamination steel, die cast with high conductivity aluminum, Shrunken fit on to a high strength carbon-steel shaft. The rotor assembly is dynamically balanced to Provide low noise and smooth, vibration-free operation for long trouble free life.

BEARINGS :

All motors use 100,000 hours direct coupled/25,000 hours belted, anti-friction, deep-grooved ball Bearings of 63 series, on drive & non drive end, tight fit in 160 Frame & above

COOLING METHOD:

IC0141 bi directional cooling fan.

CONNECTION:

Star-connection for up to 3Kw, delta-connection for 4Kw and above.

WARRANTY:

Oxford motors are warranted to be free from defects in material, workmanship for a period of one year.

Note : 1. The figure is of B35 type. There are frame feet and flange.

2. B3 type motors have frame but no flange, the dimensions have no. M,N,P,S,T and LA

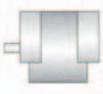

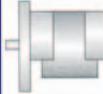

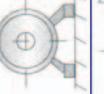

3. B5 Type motors have flange but no frame feet, the dimensions have no. A, B C, AB, BB, HA and K

4. H63-90 without lifting bolts.

Mounting Arrangements

The Commonly used mounting arrangements and corresponding frame numbers are shown in table 1

Table 1

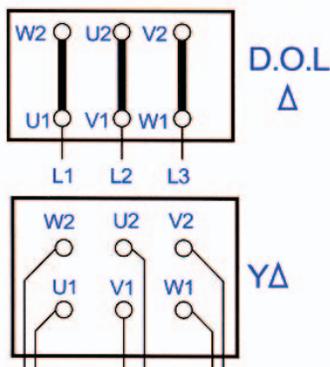

Mounting	Basic			Variations									
	B3	B5	B35	Based on B5		Based on B3					Based on B35		
				V1	V3	V5	V6	B6	B7	B8	V15	V36	
													
Frame	63-355	63-280	63-355	63-355	63-180								

Bearings

Frame	2-Pole		4,6,8-Pole	
	Driving End	Non-Driving End	Driving End	Non-Driving End
63	6201ZZ	6201ZZ	6201ZZ	6201ZZ
71	6202ZZ	6202ZZ	6202ZZ	6202ZZ

Connection Diagrams

Star Delta

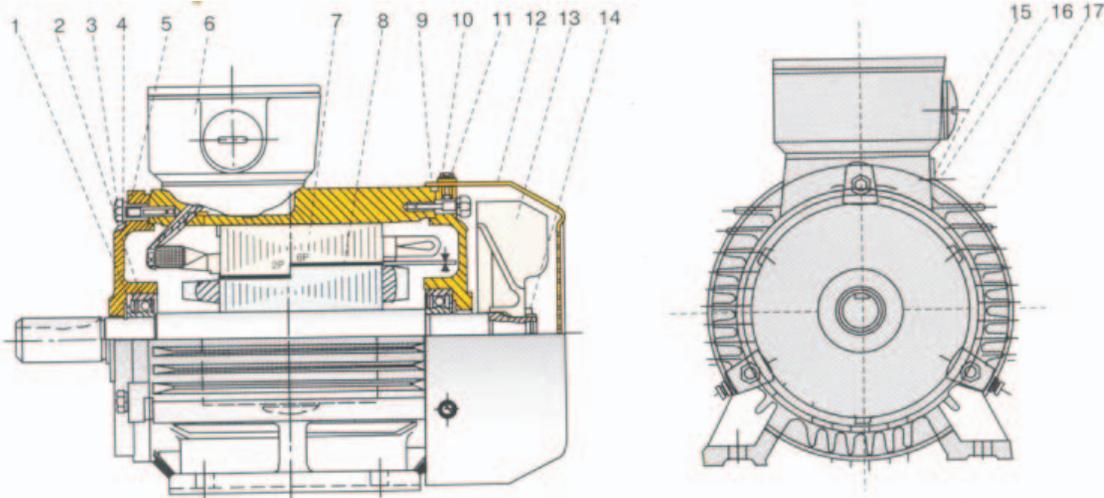

Motors of 3kW and above

Dual Voltage Δ / Y

Motors of 2.2kW and below

MATERIAL LIST

Item	Description	Item	Description	Item	Description
1	Wave-form Washer	7	Stator Pack With Winding	13	Fan
2	Bearing	8	Rotor	14	Circlip
3	Bolt	9	NDE Shield	15	Rivet
4	Spring Washer	10	Screw	16	Nameplate
5	DE shields	11	Washer	17	Frame
6	Terminal Box	12	Fan Cowl		

OPERATING CONDITION

Type	Three phase squirrel cage induction motor
Enclosure	Totally - Enclosed Fan Cooled
Voltage \pm variation	415 \pm 6%
Frequency \pm variation	50HZ +5%
Combined variation	10% (Absolute Sum)
Altitude	Up to 1000M
Relative Humidity	Up to 100%
Degree Of Protection	IP55
Class Of Insulation	Class F
Ambient Temperature	45 ⁰ C
Service Factor	1.15
Duty	S1 / Continuous
Position of Terminal Box Connection	Top at Drive End Up to 3 kw - Star >4 kw - Delta
No. of leads	3 / 6 leads for STAR / DELTA
Direction Of Rotation	Bi - directional
Cooling	IC 01 41 (TEFC)
